

User Guide

Step1 - Compile:

Run make to compile all codes.

Step2 - Run SuperNode:

Use command `./RunSuperNode.sh <port> [<max number of nodes>]`(if omitting, the default value is $2^{16}-1$) to setup and run super node.

Step3 - Run Nodes:

Use command `./RunNode.sh <supernode IP> <supernode port> <node port>` to setup and run nodes.

Step4 - Run Client:

Use command `./RunClient.sh <supernode IP> <supernode port>` to run client. And then follow the usage it shows to continue.
